We Are

Data Engineering

Adopting a modern data stack makes data accessible to everyone in your organization

About Us

We Are Data Engineering

Every company has data - financial, healthcare, customer, employee - but can everyone access that data and is it reliable and accurate? Becoming a data-driven organization means having necessary and relevant data available at your fingertips. We will work with you to take raw data from both internal and external sources and prepare it for analysis, visualizations, executive dashboards and more. We have an extensive history working with organizations of all sizes to make data accessible throughout the organization with more agile and adaptive pricing models than ever before.

Why Choose ETG?

In today's data-driven world, having a modern data stack is essential for any business looking to stay ahead of the competition. Our team has wide-ranging experience in building and maintaining data platforms using the latest tools and technologies.

Services

A Full Suite of Data Engineering Services

Leverage a modern data stack for ingestion and load of raw data and setting up cloud data platforms.

Raw & Unstructured Data

We will work with you to set-up, configure and/or optimize a data lake to house raw, unstructured data.

Data Marts & Warehouses

Our data engineers will take preprocessed data and structure it appropriately to meet the varying needs within your business.

ETL/ELT Processes

These processes and pipelines are the data super highways within your organization that we will help you navigate.

Cutting Edge Platforms

We can show you how to leverage cutting edge services and platforms from AWS, Snowflake, Databricks, and more.
